

Quality Policy

Offer products and services in injection molding and extrusion of plastics that meet and comply with our customers' requirements, needs and expectations.

Create and maintain a culture that encourages all employees to strive for continuous improvement in all quality areas of the company.

Deliver products and services which meet or surpass product requirements, delivery times, delivery reliability while ensuring high customer satisfaction and maintaining well-functioning communication both with customers and suppliers as well as internally within the organization.

Environmental Policy

Promote a better environment in our work to develop and manufacture environmentally adapted plastic products with a long life and to have a life cycle perspective on what is produced.

Reduce our environmental impact by complying environmental legislation, other requirements, preventing pollution and working with continuous improvements.

Efficiency in our production through reductions in energy consumption, PE disposal and combustible waste.

Openly report our environmental work and status supported by statistics.
